| Title: | “D2.12: <i>Time for Synthesis – Identity [R]Evolution (Booklet)</i> ” |
| Author: | WP2 |
| Editors: | David-Olivier Jaquet-Chiffelle (VIP) Thierry Nabeth (INSEAD), Denis Royer (GUF) |
| Reviewers: | Thierry Nabeth (Booklet), |
| Identifier: | D2.12 |
| Type: | [Booklet + Web presence] |
| Version: | 1.0 |
| Date: | 4 May 2009 |
| Status: | [Final] |
| Class: | [Public] |
| File: | |

Summary

Deliverables 2.12. Time for Synthesis– Identity [R]Evolution (Booklet), represent a work aiming at presenting FIDIS in an engaging way to the general community of people interested by the concept of Identity. The objective of this approach was to strike people imagination, in particular contributing to augment FIDIS presence and impact.

The core of this work is the booklet *Identity [R]Evolution*, a set of representative futuristic scenarios of the topics covered in FIDIS (which content originates from FIDIS deliverable D12.5 : Use cases and scenarios of emerging technologies), as well as a brief presentation of the work to be presented for the FIDIS Submit Event in Cyprus in May 2009, and available in the FIDIS Summit Book..

This deliverable is delivered in multiple forms:

- A high quality 60 pages printed booklet.
- The web availability of this booklet (using pretty visualization)
- An associated set of videos of the FIDIS sessions taken at the FIDIS Summit Event in Cyprus in May 2009, and also made available on the web

Executive summary

Deliverable 2.12 Time for Synthesis – Identity [R]Evolution (Booklet), represents a work aiming at presenting FIDIS in an engaging way to the general community of people interested by the concept of Identity. The objective of this approach was to strike people imagination, in particular contributing to augment FIDIS presence and impact.

The core of this work is the **booklet: Identity [R]Evolution**, a set of representative futuristic scenarios of the topics covered in FIDIS (which content originates from FIDIS deliverable **D12.5 : Use cases and scenarios of emerging technologies**), as well as a brief presentation of the work to be presented for the **FIDIS Summit Event in Cyprus** in May 2009, and available in the **FIDIS Summit Book..**

This deliverable is delivered in multiple forms:

- A high quality 60 pages **printed booklet**.
- The **web availability** of this booklet (using pretty visualization)
- An associated set of **videos** of the FIDIS sessions taken at the **FIDIS Summit Event** in Cyprus in May 2009, and also made available on the web

1 Presentation

Deliverable 2.12. Time for Synthesis is a deliverable that was proposed at the mid time of WP2 to provide a synthetic view of the work being conducted in FIDIS. The objective of this deliverable was to provide this synthesis to a large audience in an engaging way and to raise awareness towards the work conducted in FIDIS. The form of this deliverable was left open, except that its form would have to be innovative, so as to create a maximum of impact and momentum.

The realisation of this deliverable was restarted several times during the project, exploring different possibilities ranging from the creation of some video presentations, or the setting-up of a virtual community, or the design of an multi-media experience (such as a game).

The difficulty of the task, the need to rely on high quality content that would need to be found, the result of our analysis of previous approaches that were successful (and in particular Booklet *del 2.6: Identity in a Networked World – Use Cases and Scenarios*), as well as the availability of determinant expertise (in particular the availability of a very good professional designer at VIP) conducted to the present deliverable which consists in:

The creation of a high quality booklet based on some high quality material (D12.5 : Use cases and scenarios of emerging technologies, and the FIDIS Summit book) that is made available in both a printed form and via the web using advanced presentation.

Besides this deliverable would also include some *videos* to be taken from the presentations of the FIDIS presenters at the FIDIS Summit event in Cyprus in May 2009 and that would be made available in the FIDIS web site.

The high quality booklet provides a material that will be used to facilitate the understanding of identity in the society in the future.

Note: It should be noted that the booklet will be used in an educational context and for instance in English teaching classes in Switzerland.

The other advantage is that the booklet will also represent a promotional material for the FIDIS Summit Book that will be distributed in the FIDIS Summit event in Cyprus.

1.1 *Content of the booklet*

Booklet: Identity [R]Evolution -- Multi-Disciplinary Perspectives

David-Olivier Jaquet-Chiffelle, Editor, May 2009

Abstract —The first part of this booklet presents several possible futuristic scenarios, some of them in the near future, within the next 20 years, others in the long-term, e.g., to explore the areas of human enhancement and robotics. The second part of this booklet is meant as a teaser to discover the **FIDIS Summit book** “*The Future of Identity in the Information Society – Opportunities and Challenges*”, a complete document published by Springer that offers a

synthesis of the main achievements of FIDIS."

See the Annex for the table of Content.

1.2 Availability & communication

This booklet is available in **printed version** (high quality).

Several thousand (in the order of 6000) copies have been printed.

An **electronic and interactive version** is also available on the web at:

Url <http://www.fidis.net/resources/identity-revolution/>

Finally the booklet has been announced using the different means such as in FIDIS web site, the fidis LinkedIn group, fidis on Twitter, etc., and other means are being considered (such as YouTube for the Videos).
